Projects

Portfolio: A dynamic portfolio showcasing my journey in Front-End development. Developed with Next.js, React, and Supabase. Includes real-time database access, administrator authentication, Dark Mode, and GitHub API integration. Written in TypeScript, utilizing Framer Motion for animations, Tailwind CSS for styling, and Resend API for sending email.

Jogo a Jogo: A responsive React app displaying results and information about world football games. It utilizes an external RestAPI for data access, features authentication with a login form, and various CSS animations. User accounts contain data managed by the useContext Hook. The interface was designed by me in Figma and programmed with SASS.

NBA 23-24: A web app providing real-time data about the NBA. Users can explore teams, rosters, statistics, and games through a user-friendly interface (including Dark Mode). Developed in React, with TypeScript and tools such as React Router, Framer Motion, and React Testing Library.

Skills

Front-End Development

I have built a solid foundation in JavaScript programming over the past 3 years. I had the privilege of learning professional software engineering techniques for 2 years, being mentored by a Principal Software Engineer. I am professionally certified in Front-End Development by Meta and recently completed a 350-hour Web Programming course at CINEL, where I developed database-driven web applications.

Communication

I hold a degree in Communication and have a professional background in corporate communication through article writing and development of Communication and Marketing plans. I express my ideas clearly and adapt my communication to different contexts, including conflict resolution or teamwork situations.

Experience

Eddisrupt, Front-End Development Mentee – March 2021- March 2023

- Collaborated with William R. J. Ribeiro, an experienced mentor and Principal Software Developer.
- Acquired software development techniques such as documentation writing, unit test formulation, separation of concerns, and effective problem-solving.
- Developed 6 applications in JavaScript and React and learned project workflows.

Education

Post-Graduation, Web Design & Development, IADE, Lisbon (PT), 2016-2017

Bachelor's Degree, Communication and Multimedia, Polytechnic Institute of Leiria, Leiria (PT), 2007-2010
